

Styrofoam Bug

Materials

- Styrofoam egg (body of bug - choose a size you want)
- Styrofoam ball (head of bug)
- Black pipe cleaners
- Acrylic paint
- Wiggly eyes
- Glue
- Felt
- Craft stick

Directions

1. Cut the styrofoam egg and the styrofoam ball in half lengthwise. Rub the two halves together to sand the edges.
2. With a craft stick, press abdomen indentations onto the flat side of the styrofoam egg.
3. Paint the abdomen and head of the insect on both the front side and back.
4. Once the paint is dry, glue on the wiggly eyes. Cut a mouth shape out of felt and glue onto the head.
5. Glue the head of the insect onto the body and insert pipe cleaners to make the legs and antennae.
